

Thank you for purchasing the ESSW 2.0

Give us a review [store page](#)

-. Enable the Depth and Opaque Texture.

Go to Assets/Settings/PC_RP Asset (Universal Render Data)

And enable the Depth Texture and the Opaque texture.

Set the Opaque downsampling to none for better under water look

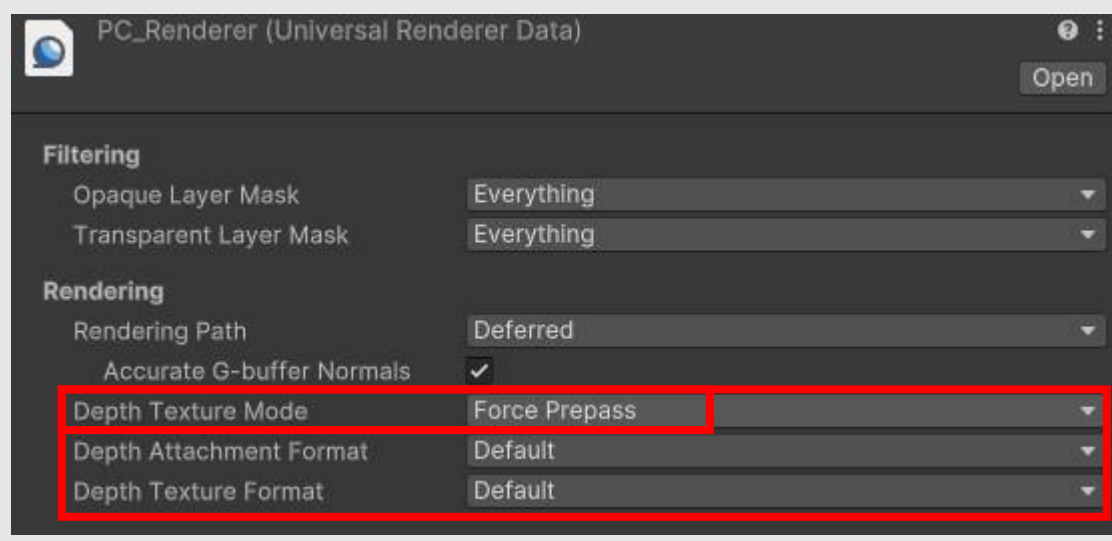

-Depth Texture mode (important).

If the depth dosnt appear in the game window then :

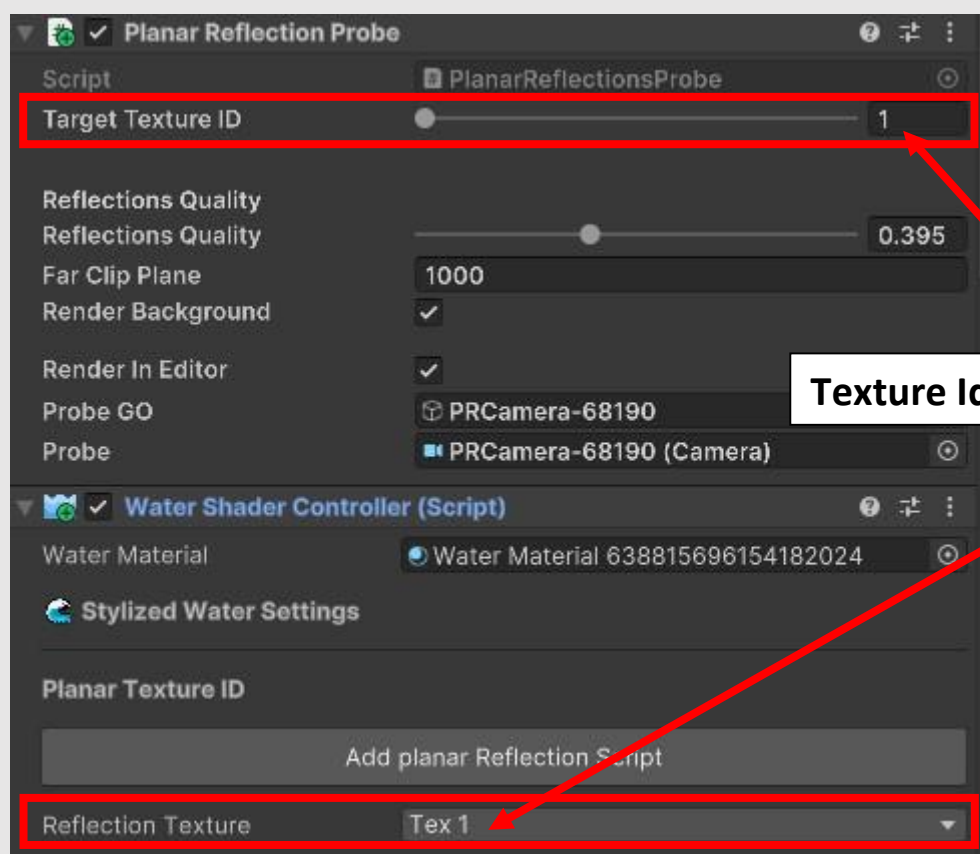

Go to Assets/Settings/PC_Renderer (Universal Render Data)

And set the Depth Texture Mode to **Force prepass.**

(this allows for under water visibility in the both game scene and editor).

How to setup planar reflection:

1 Click add planar reflection btn in the inspetor.

2 make sure that the texure ID is the same in the planar reflection script.

3 Each water surface must have a deferent Texture ID in Single scene.
